What right do you have to take something that helps me in my job away from me. I can tune into just about any where I'm going and get a weather update or a traffic update with just the flick of a button. I don't have to wait every fifteen minutes to get an update that is not going to help me much at all or give me what I need. We pay for this service and we should be able to keep this service. Please vote no on NAB'S petition 04-160. Thank You, Tammy Skiles
